DETAILED ACTION

Election/Restrictions

1. Claims 4-6, and 21-22 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), previously withdrawn from consideration as a result of a restriction requirement, 12/03/04 hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 12/03/2004 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-37 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-14, the prior art alone or in combination does not teach the limitation of a capacitive sensor comprising a non-conductive web intermediate a first polymeric conductor and the second polymeric conductor to maintain a substantially fixed separation distance between the first and the second polymeric conductor, wherein the web, the first polymeric conductor and the second polymeric conductor embedded within a non-conductive polymer.

With respect to claims 15-28 the prior art alone or in combination does not teach the limitation of an elongate capacitive sensor for installation about an opening in a motor vehicle, the opening having at least one corner, the sensor comprising: a one-piece extruded non conducting body; and the body configured to substantially maintain a nominal separation distance between the first polymeric conductor and the second polymeric conductor after installation about the corner.

With respect to claims 29-30, the prior art alone or in combination does not teach the limitation of a capacitive sensor comprising a polymeric conductor embedded within a non conductive polymeric body, a cross sectional periphery of the polymeric conductor substantially defined by the body.

With respect to claims 31-33, the prior art alone or in combination does not teach the limitation of a method manufacturing a capacitive sensor for installation about a motor vehicle opening having at least one corner, the method comprising steps of forming a web configured to substantially maintain the separation distance upon installation about the corner.

With respect to claims 34-37, the prior art alone or in combination does not teach the limitation of a capacitive sensor comprising: a web and first and second polymeric conductor defining a radius of curvature and the web maintaining a substantially fixed separation distance between the first and the second polymeric conductor along the radius of curvature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T. Ha whose telephone number is 571-272-1974. The examiner can normally be reached on Monday-Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
